About Me

Enthusiastic Web Developer with a dedicated focus on Front-End expertise. Demonstrated proficiency in HTML, CSS, JavaScript, and ReactJS, specializing in translating imaginative designs into dynamic web solutions using frameworks like ReactJS and Tailwind CSS. Committed to crafting user-friendly and visually captivating websites. Proactively stay abreast of the latest technology trends. If you seek a Front-End enthusiast adept at transforming code into compelling digital narratives, I welcome the opportunity to connect.

Experience

KodeGo Bootcamp   August 2023 - November 2023

- Graduated as one of the top-performing students, showcasing exceptional dedication and proficiency in Full-Stack Web Development.

Project: **Bret'les Homes** (**View Website**)
Tools Used - Vite, ReactJS, Tailwind CSS, SASS

- This website focus on seamlessly integrating API functionality to provide real-time data on real estate prices and relevant information.
- Led a team in the development of the real estate website, indicating a leadership role in guiding and overseeing the project.

IT in a POGO Company   January 2024 - March 2024

- Designed and developed engaging landing pages aimed at increasing user acquisition, utilizing advanced web technologies to create intuitive and visually appealing user interfaces.
- Successfully mirrored the existing registration page to enhance system redundancy and user access reliability using NGINX reverse proxy, significantly improving website uptime and performance.
- Led the deployment of the company website on AApanel, streamlining the deployment process and ensuring seamless, efficient, and scalable web hosting solutions.
- Managed server infrastructure on DigitalOcean, optimizing server performance and ensuring robust, secure, and scalable cloud hosting environments to support the company's digital assets.
